23 February 1961

25X1A

MEMORANDUM FOR: Chief, Development Branch, DPD

SUBJECT : Filing of Patent Applications by

25X1A

1. The attached correspondence from includes requests for authority to file patent applications on the following inventions conceived under Contract No.

25X1A

25X1A

a. Resonant Rings and Application thereof. This invention is referred to in letter S-20,110 dated 13 February 1961 and is described in Technical Proposal 6B, dated 25 April 1960, Pages 39 to 49 inclusive and in Figure 9 on Page 46. (This proposal is not on file in Contract Branch)

25X1A

25X1A

b. Automatic Frequency Control Device. This invention is referred to in letter S-20,110 dated 13 February 1961 and is described in attachment thereto.

25X1A

c. Balanced Mixer. This invention is referred to in letter S-20,113 dated 13 February 1961 and is described in attachment thereto.

25X1A

2. has requested authority to file patent applications for these inventions on an unclassified basis since it is their opinion that no security problems are involved. It is requested, however, that each of the inventions be reviewed to determine from a technical standpoint whether or not the patent applications may be filed on an unclassified basis.

3. Please let me have your comments as soon as practicable in order that disposition of the Contractor's request may be made

SECRET

within the 30-day period provided by the contract. It is requested that the attached papers be returned to the Contracts Branch.
